

PORTABLE Cell phone SIGNAL JAMMER

Cell Phone Jammer J-240A

<http://www.jammer4uk.com/>

Thanks for choosing our jammer for shielding mobile phone's signal.

In order to be familiar with the operation of this machine as soon as possible, this end-user's manual provides, in details, the introduction of product method of use, system set, the points for attention and variable notices.

This product can be used in any place where mobile phones are prohibited to be used!

Being familiar for use immediately.

Now let us introduce this portable mobile signal jammer to you and make you better understand about the positions of all the buttons as well as operational way.

Top view(output)

The antenna connectors of Output power and working instruction LED on the Cover.

Longer White lines connect with antenna which are identified by CDMA GSM, DCS PHS and 3G as the indication accordantly, and turn on the power. Green light is on; means the jammer is working normally.

Left side view(switch)

Power switch, press the button to turn on the machine.

And the indicator light will be on in Cover Green light.

Red light: when charging for jammer, the indicator light will be on.

When the built-in battery is charged full (usually needs 8 hours), the indicator light will be off.

It can be working while charging.

Feature

A part of the features will be provided for better use of the jammer.

Specification

Type	Output Port	Frequency	Radius range
Type A	GSM900	925-960 MHz	Up to 20 m @ depending on the mobile service provider's network condition
	GSM1800	1805-1880 MHz	
	3G	2110-2170 MHz	
Type B	CDMA GSM	850-960 MHz	Up to 20m @ depending on the mobile service provider's network condition
	DCS PHS	1805-1990 MHz	
	3G	2110-2170MHz	
Power supply: AC220V-DC12V		Built-in Battery:2000mA/h	

Total output Power: **2.7-3watt**

Technical Feature

- ✚ Taking use of super-high frequency and mini-power interference technology, high efficiency..
- ✚ Effectively making subsections. Just interfering downlink and no interception on the base station.
- ✚ Extreme portability. The weight for machine itself and antenna are just 0.68KG
- ✚ Low power consumption, working time for machine is about 90 minutes, supplied power by battery.
- ✚ Slow start up design of circuit. These elements can maintain the stable operation condition with high integration.

Connection

Three SMA connectors which are used to connect with antenna (CDMA GSM/DCS PHS 3G or GSM,/DCS/3G).One charging connector,

✚ Accessories

This portable jammer consists of many subassemblies.
They include

[Mainframe \(with built-in storage battery\)](#)

[Different kinds of antenna](#)

[Charger](#)

We will make a brief introduction about the main subassemblies' function.

✚ Antenna

Omni-directional antenna (GSM CDMA/DCS PHS/3G or GSM/DCS/3G).

When connecting the antenna with machine, please be sure to connect as the indication on the machine.

Charger

Car charger:

Charger AC220V/110V input, about DC12V output.

Notices

1. [be sure to connect all the antenna first before the power supply is switch on. Please do not take off antennae when the machine is working.](#) Antenna shall be used vertical to the ground, working more efficiently.
2. Please don't put the jammer in the water and fire to avoid using in the bad, Condition of over-wet, over-hot, high voltage and high magnetism.
3. If the jammer cannot be charged or other unconventionality (i.e. the indicator light doesn't light up), please contact with the distributor in local place. Any refit an incorrect repair is not allowed.
4. Any ruin and disrepair caused by incorrect operation and disassembly will exclude from the repair for free of charge.
